

Robust High Quality Marine Systems

Portable NOx / SOx / COx Exhaustgas Analyser

- robust and reliable
- easy to operate
- for heavy-fuel applications
- incl. PC interface
- direct print out
- GL approval pending
- Made in EU

Videoscope with Pan & Tilttable Camera incl. 2 GB Memory

- endoscopic inspection of difficult-to-access areas:
- turbo chargers
- boilers
- cylinder liners
- etc.
- incl. 20 m. Push rod
- camera diameter 26mm / 40mm / 10mm
- Made in EU

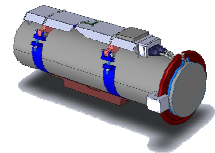

DIESELSWITCH MK II Fuel Changeover System

- safe changeover between HFO, MDO and MGO
- blending of fuel qualities
- incl. compatibility test of fuels
- GL type-approved
- Made in EU

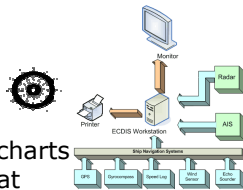

Thrust & Torque System EVOthrust®

- real thrust measurement
- real torque measurement
- easy to install on the shaft
- for newbuildings & retrofit
- determine propeller efficiency
- incl. powerful PC software
- Made in EU

ECDIS Systems

- Fully DNV-certified
- wheelmark approved
- single 6 dual ECDIS supports S-57 vector charts
- C-Map's CM93/3 format
- dynamic license system
- pay only for the charts your are using
- Made in Israel

MIP Systems

- for main & aux engines
- easy to operate
- with brilliant colour display
- with powerful PC software
- for retrofit and newbuildings
- extremely robust pressure sensor enables perfect engine-balancing
- Made in EU

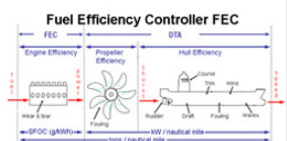

Ultrasonic thickness gauges

- up to 250mm wall thickness
- disregards paint & coatings
- no grinding
- for all types of metall
- multiple echo
- acc. IACS Annex 1
- made in EU

FEC fuel efficiency controller

- monitor the overall performance
- truly measures the SFOC
- incl. ISO correction
- uses existing sensors
- perfect tool for emission certificate trading
- designed by Chief engineers!

We are aware that this information only provides you with a rough overview and will gladly provide you with further, detailed information.

Please do not hesitate to contact us for further information, either by completing this short form or by phoning us:

- Portable Exhaustgas Analyser (NOx)
- Videoscope – Endoscopic Inspection
- Fuel Changeover System
- Thrust & Torque Measurement Systems
- ECDIS Systems
- MIP : In-Cylinder Pressure Measurement
- 3 echo ultrasonic thickness gauges
- FEC full efficiency controller
